About Me

I am a statistics student with experience in industry-academic collaboration, including consulting projects with hospitals and the pharmaceutical industry.

I have applied statistical testing and data visualization to support data-driven problem solving and reporting. I am experienced in handling data analysis tasks with attention to accuracy and structured presentation of results.

Skills

- **Coding Language:** R, Python, SAS
- **Tools:** Rstudio, VS code, Git/GitHub
- **Data Visualization:** ggplot2, matplotlib, seaborn, Tableau, Power BI
- **Data Analysis:** Hypothesis Testing, Machine Learning, Deep Learning

Education

Master of Statistics

National Cheng Kung University

2023.8 - 2026.2

GPA: 4.14/4.30

Bachelor of Statistics

National Cheng Kung University

2019.8 - 2023.6

GPA: 3.99/4.30

Award

- Book Award: 2020 Spring (1), 2020 Fall (3), 2023 Fall (1), 2024 Spring (1)
- Promenade of Data Science 2024: 1st prize

Certificate

- English: **TOEIC 815** (2023/10/22), **IELTS 7.5** (2024/12/19)

Work Experience

Teaching Assistant

National Cheng Kung University

2023 - 2025

- **Statistics and Big Data Analysis** (2023 Fall, 2024 Fall, 2025 Fall)
- **Categorical Data Analysis** (2025 Spring)

Short-term Research Assistant

National Cheng Kung University Hospital

2023.6 - 2023.9

Research Assistant to physical therapist Ting-Chun Huang.

Assisted doctor in analyzing patient data and creating posters.

Research Study Assistant

National Cheng Kung University

2021.3 - 2026.2

Research Assistant to Associate Professor Mi-Chia Ma.

Mainly participated in a research project funded by the Ministry of Agriculture. Responsible for data organization, statistical analysis, research report preparation, and project expense reimbursement and administrative coordination.

Participated in several industry-academic collaboration projects, including consulting cases with ScinoPharm Taiwan and the Tainan Hospital (Ministry of Health and Welfare). Used statistical tests and data visualization to solve real-world problems.
